### ***Response to Amendment***

Receipt is acknowledged of applicant's amendment filed February 27, 2004. Claims 1, 2 and 5 have been canceled without prejudice. Claims 3, 6-9 are withdrawn for further consideration, and claim 4 is pending and an action on the merits is as follows.

Applicant's arguments with respect to claim 4 have been considered but are moot in view of the new grounds of rejection.

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 4 is rejected under the judicially created doctrine of double patenting over claims 1 and 3 of U. S. Patent No. 6,371,198 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: A heat storage device comprising a heat storage

Art Unit: 3743

tank charged with a heat storage material for storing heat from outside the heat storage tank, the heat storage tank having a central portion and an outer portion; heat exchange means for executing an injection and an extraction of heat between inside and outside the heat storage tank by heat exchange between the heat storage material and a heat transfer medium, the heat exchange means being disposed so that the central portion and outer portion of the heat storage tank; suppressing means for suppressing natural convection of the heat storage material, the suppressing means being disposed in the outer portion of the heat storage tank.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Response to Arguments***

Applicant's arguments filed February 27, 2004 have been fully considered but they are not persuasive.

Applicant's arguments are moot in view of the Double Patent Rejection as stated above.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
